

We want to drink There is a lack of fresh water

Give a chance to our world **Save water**

There is no enough fresh water

# THE PROBLEM OF

We want to drink  
There is no enough fresh water

# FRESH WATER IN THE WORLD

There is no enough fresh water  
People don't want to drink salt water  
in the future

The UN recognizes water scarcity as the problem number 1 in the world

By 2025, 3.2 billion inhabitants of the planet will suffer from a lack of fresh water

The problem of lack of water resources is not a natural process, but the result of human activity

The situation, although serious, is completely solvable

We must take action to preserve fresh water.

Finally, we can say that everything is in human hands.
